Revealing Love is an open workshop for anyone interested in increasing the love and life-energy flowing through their lives. Love comes in all shapes, sizes and colors and our constellations will reflect this. We will be utilizing constellations styles from around the world to help resolve our very specific yet universal desires to reveal love in our lives. Experience the dynamic versatility of Systemic Constellation Work! We might see anything from abstract and conceptual constellations to table-top, organizational, internal or dream constellations, as well as many others!

About Systemic Constellations

Appealing to our innate human desire to live our lives in balance and harmony, this phenomenal methodology taps into the wisdom of the systems in which we live – our family systems, community systems, and organizational systems. The wisdom reveals and can transform the subtle energies, dynamics and patters that either enhance or hinder our ability to thrive. The methodology is a facilitated process that explores life's complexities and skillfully transforms them so that the most harmonious outcomes may arise. Bring your life questions, issues, challenges and dreams to be explored.
